

SCRAM™

HOUSE ARREST

House Arrest, built for today's homes.

Introducing SCRAM House Arrest™, a standalone home curfew system that fully integrates in a single software application with our SCRAM Systems™ suite of electronic monitoring technologies.

SCRAM Continuous Alcohol Monitoring™

Continuous Alcohol Monitoring (CAM), or combined CAM + House Arrest, at the flip of a switch. It's 24/7 monitoring for your high-risk/high-need alcohol clients.

SCRAM Remote Breath™

The first and only handheld, wireless, portable breath alcohol device with automated facial recognition and GPS with every single test. For your lower-risk offenders or those who have earned less intensive testing and monitoring.

SCRAM One-Piece GPS™

This OM400™ Global Positioning System technology is a one-piece location monitoring system that combines Omnilink's industry-leading accuracy and reliability with all-new RF compatibility, 2-way communication to send notifications to offenders, and a one-of-a-kind strap design that virtually eliminates false alerts.

SCRAM House Arrest™

Standalone house arrest monitoring built to work with today's home communications systems. Operates over home Internet routers, standard or digital phone lines, DSL, Vonage®, or an optional SCRAM-provided wireless system.

“An RF technology with flexible connectivity is exactly what our clients need. A reliable RF system that integrates into the same software as SCRAM's GPS, Continuous Alcohol Monitoring, and Remote Breath technologies—with one log on, one system—is exactly what we need.”

— Larry Vanderwoude, LCDC
CEO, Recovery Healthcare Corporation

The SCRAM Systems Compliance Platform™

The SCRAMNET™ secure web application is the core of the platform, which brings together everything from monitoring of our full product suite to our best-in-industry court support program, 24/7 customer support, mobile applications, offender compliance analytics, and beyond.

The Most Flexible House Arrest System on the Market

- Less than 3 out of 10 U.S. Homes today have a landline telephone
- Older systems, designed around landlines, have become difficult to manage in today's homes
- SCRAM House Arrest transmits over any available communication method—landline, cellular, or home Internet service

SCRAM Systems Suite of Products

Fully integrates with all **SCRAM Systems technologies** on the **SCRAMNET** software platform
